### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities:
  - a. In page 1, lines 5-12, please provide U.S. Application Serial Nos. and patent nos. if available.
  - b. In page 4, paragraphs [0016] - [0018], please designate appropriate Figure Nos. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Larson et al. (US 6,039,694 of record).

Larson teaches in col. 5, line 31 - col. 6, line 35 and in Fig. 2 (reproduced below), a method and apparatus for ultrasound therapy including a disposable transducer seal comprising a membrane (3) being substantially transparent to ultrasound energy wherein the membrane is non-porous to water and acoustic coupling fluids; a retainer (7) having a substantially annular configuration for holding the membrane; and a means (col. 5, line 42) for mating the retainer with transducer housing. Larson's invitation of using any other means capable of holding the membrane against the transducer housing (col. 5, lines 40-45) would meet the specific limitations of the dependent claims claimed by the applicant.

Claim 1 is further rejected under 35 U.S.C. 102(b) as being anticipated by Law et al. (US 5,762,066). Law teaches in Fig. 4 (reproduced below), an apparatus for ultrasound therapy using high intensity focused ultrasound (HIFU) including a disposable transducer seal (42) comprising a membrane (38) being substantially transparent to ultrasound energy wherein the

membrane is non-porous to water and acoustic coupling fluids; a retainer having a substantially annular configuration for holding the membrane (col. 14, lines 19-28 also see Figs. 1 and 12 item 90; and a means (90) for mating the retainer with transducer housing.
